FUTUREWORK SYSTEMS ANNOUNCES DEVELOPMENT SERVICES LEAD

(RINGWOOD, NJ) FutureWork Systems (FWS) announces a new hire; Mary Ann Ryan joins as the Development Services Lead.

“We’re excited to have Mary Ann join our growing team! She brings to FutureWorks 30-years plus of extensive software development experience. Her laser focus on ensuring the delivery of not only quality software to meet customer needs but, most importantly, her passion and desire for delivering and supporting an excellent end-user experience is consistent with FutureWork Systems’ goals,” says Geoff Smith, President of FutureWork Systems.

Ryan leads FutureWorks new Development Services team. This team serves as a liaison between the Development, Customer Support, Marketing and Sales Teams. She actively serves FutureWork client needs by identifying and defining business requirements for application service enhancements and new product design and development initiatives. In addition, Ryan and the Development Services team manage client application

maintenance tasks, including quality assurance, data processing, and end-user usage data and statistics to support Development and Client Service teams.

Ryan’s previous position as Sr. Quality Analyst at Infor, a multi-national enterprise software company where she spent 18 years of her career, has helped her establish a vast array of skills necessary for ensuring successful software design, development and delivery.

“I am excited to join the FutureWork Systems team and look forward to being part of the BI solutions they bring to the public sector. My career has been focused on delivering quality software solutions and FutureWorks' vision and culture of innovation and client satisfaction align with my experience and goals. I look forward to delivering quality, innovative solutions to the company’s current and future customers.”

FutureWork Systems provides web-based Business Intelligence application services specifically designed, developed and implemented to effectively and efficiently address workforce development system needs to support data-driven decisions. For more information, contact Geoff Smith at (800) 448-2266.
